From what I understand about construction the foundation is the most important part of the building. If the foundation is weak it really doesn't matter how well-constructed the building is, eventually there will be problems. On the other hand, if the foundation is sturdy and well-constructed the building has a greater chance of standing through storms. Have you ever wondered why some Christians can go through tremendous trials and come through with victory, have an amazing testimony, a faith that is stronger for their trial, and are tremendous witnesses for Jesus, while others seem to be nearly destroyed by their trial and crash in a horrific defeat? The difference is in the foundation. Are you building on the right foundation? Today as you pray, ask God to help you, and those in your church, to build their lives on the right foundation.

For the wonder of each hour...  
Hill and vale, and tree and flower...  
**Christ our God,**  
to Thee we raise  
This our hymn of grateful praise.
